<https://github.com/pocketarc>

Software engineer with a strong background in React, TypeScript, and SQL, with a focus on automation and performance optimization.

---

Proficient as both a backend and frontend developer. JavaScript, TypeScript, React.js, Node.js, Kafka, GraphQL, Golang, DevOps, Amazon Web Services (AWS), Vue.js, MySQL, PostgreSQL, SQL, PHP.

---

#### Just Move In / Senior Software Engineer

July 2019 - Present, Bournemouth

Successfully launched a new core platform and led data migration from the previous platform. Led the development and launch of a new management system for Just Move In partners. Implemented continuous deployment, continuous integration, and automated testing practices, improving development efficiency.

#### TurnKey I.T Solutions / Senior Software Engineer

January 2015 - July 2019, Weston-super-Mare

Led the development of systems for asset tracking, rehab case management, claims adjusting, and property management. Developed a YouTube-like system for CCTV in buses across London, to help the London Metropolitan Police. Developed a modern React-based system for iPads that used facial recognition to keep an accurate fire register for high-occupancy buildings.

#### Terra Duo / Freelancer

2007 - January 2015, Weston-super-Mare

Led the design and implementation of numerous full-stack software development projects for a diverse range of clients, consistently delivering high-quality solutions on time and within budget. Demonstrated strong problem-solving skills by devising ingenious solutions to complex technical challenges, ensuring client satisfaction and fostering long-term relationships. Both TurnKey I.T Solutions and Just Move In are former clients that have gone on to work with me full-time.

---

## Education

---

### Christian Brothers Secondary / High School

Co. Wexford, Ireland

Graduated with honours. 500/600 points on the leaving certificate (high school equivalency).

---

---

## Personal

- I'm Portuguese. I went to school in Ireland, and lived in the UK for the past 12 years. I've just moved to the USA.
- I speak 5 languages. In order of fluency: English, Portuguese, Spanish, Italian, and French.
- I like to play games. Overwatch and Dead by Daylight are by far the biggest time sinks, but my favorites remain simulation and RTS games (Civilization, SimCity, etc).
- I used to stream a horror game (Dead by Daylight) on Twitch. During that time, I built up a significant following and a strong community.
- I used to daytrade and spend a lot of time poring over company financials and historical data to try to get an edge. I still enjoy discussing investment strategies.
- Over the last several years I've been on a personal improvement journey. I've experimented with the Ketogenic diet, pushed myself forward in yoga and weightlifting, and in the past I have even developed a 28-hour-based sleep schedule (<https://28hours.org/>). Always happy to talk about self-improvement.
- Every weekend, I try to learn something new. Whether it's learning a new technology, building a new side project, or writing a new article, I'm always learning.
